PROFESSIONAL SUMMARY

Senior Business Analyst with **3+ years** at RBC Capital Markets, taking new credit and risk platforms from **0→1**. Owned product roadmap from requirements through launch, cutting quarter-end review time **75%** across a **\$15B+ corporate loan portfolio**. Self-starter who turns open problems into products, with multiple hackathon wins; seeking Analyst and Strategy & Operations roles in the Bay Area.

PROFESSIONAL EXPERIENCE

AI Product Builder | San Francisco, CA

Apr 2026 – Present

- **7 hackathon wins in 5 months (5 x 1st place)**, shipping agentic AI products end to end: Handoff, Argus, EvalForge, and more.
- Build and ship AI-native MVPs, from problem framing to working agents, using Claude Code, Cursor, and MCP integrations.

Senior Business Analyst / Product Lead | Royal Bank of Canada, Capital Markets

Jul 2024 – Mar 2026

TMS (Transaction Management System)

- Owned product roadmap for a new credit risk platform monitoring **1,000–2,000 corporate borrowers (US\$15B+ in corporate loans)** each quarter-end; cut review time from **4 days to ~1 day** for 5 global teams.
- Led business, engineering, and regional stakeholders through a parallel migration for hundreds of users, validating new-vs-old cohorts before cutover and driving **90%+ adoption**.
- Owned the analyst review experience, designing a consolidated view of parent–subsidiary financials with prior-quarter context.
- Owned data integrity across releases, validating persistence and reconciliation in SQL ahead of go-live.

Credit Hub

- Took Credit Hub from **0→1**, prototype to launch, securing buy-in for a personalized portal consolidating **~45 applications**.
- Owned the access model and drove UX decisions for bankers and analysts, defining role-based access across multiple apps.

Data Platform Modernization

- Owned prioritization and sequencing for a portfolio-wide migration of **~40 applications** to SQL Server with **zero disruption**.
- Built the **risk-based prioritization model** that became the release roadmap; personally owned **10 migrations** with zero data loss.

Business Analyst | Royal Bank of Canada, Capital Markets

Jul 2023 – Jun 2024

CCMS (Client & Credit Management System)

- Modernized the credit-data system of record for **11,000+ corporate & bank borrowers (US\$200B portfolio)**, feeding **~15 apps**.
- Designed and governed a phased migration with parallel cohorts, defining KPIs and defect thresholds to gate each go/no-go.
- Strengthened source-data controls and resolved cross-system inconsistencies pre-release; **zero downstream disruption**.

CMAP (Credit Monitoring & Analysis Platform)

- Led micro-frontend embedding of financial analysis into the credit review workflow, defining how analysts run analysis in-flow.
- Cut financial-statement prep from **weeks to days** for **~500 corporate borrowers** a quarter (**US\$7B+**); errors down **~85%**.

AI/ML Engineer | Rogers Communications

May 2023 – Jul 2023

- Supported data analysis and pipeline validation with SQL and Python on telecom-scale data infrastructure.

PRODUCT BUILDS & HACKATHON WINS

- **Handoff: 1st place, 3 awards**. Offboarding agent that maps a leaving engineer's work and runs handover in Jira and Slack. [Link](#)
- **Argus: 1st place**. QA agent that tests a product from its docs, clips the exact failure on video, and files the Jira ticket. [Link](#)
- **Gordón: 1st place**. DoorDash inventory optimizer that flags spoilage, promotes at-risk dishes, and avoids stockouts. [Link](#)
- **The Org: 1st place**. A/B-testing agent that builds AI personas from real customer data to evaluate a support agent before rollout.
- **Suits: Best Use of InsForge**. AI sandbox where lawyers safely test AI-driven legal workflows before using them on real matters.
- **EvalForge: 2nd place**. Red-teaming tool with **25 adversarial tests** across LLMs to rank policy adherence vs. cost. [Link](#)
- **Propel AI: Top 5, YC Next Unicorn**. RFP engine that drafts a full proposal from a **200-page RFP** in **under 60 seconds**. [Link](#)

PRODUCT PORTFOLIO

- **"If I Were a PM"** (LinkedIn): new product ideas + MVPs for **Strava, Spotify, DoorDash, Google Maps, Airbnb, Uber**, etc. [Link](#)
- **Build with Ashna** (YouTube): video walkthroughs of each MVP build, from customer painpoint to shipped prototype. [Link](#)

TECHNICAL SKILLS

Analysis: SQL, Tableau, Excel, Python/Pandas, A/B Testing, Data Validation & Reconciliation, Root-Cause Analysis

Tools: SSMS, Rapid SQL, JIRA, Confluence

AI: Claude Code, Codex, Cursor, OpenClaw

Methods: Agile/Scrum, SDLC, UAT & Regression Testing, Stakeholder Management, Process Improvement, Change Management

EDUCATION

Master of Engineering, Systems Science & Engineering — University of Ottawa, Canada | 2021–2023

Bachelor of Technology, Computer Science & Engineering — Navrachana University, India | 2017–2021
